flashserver version 1.1test4
Max 4.3 & 4.5 (WinXP)
by Olaf Matthes

By using this software you are agreeing to the software license at the end of this document.

System Requirements & Installation:

This software is for use with Max 4.3 (and probably later). This release is designed for use with the Windows versions of Max 4.3 only and will not work on Mac. There is a version for Mac OS X available separately.

Copy the object (flashserver.mxe) into the externals folder of your Max distribution (under 'Common Files'). Copy the help patch (flashserver.help) into the max-help folder of your Max distribution.

Usage:

flashserver is a TCP server that allows up to 256 Flash clients to connect to it using the XMLsocket functions of Flash. It requires Flash 5.0 or newer. Data can be transmitted in both directions, allowing for multi-user interaction. Detailed information how to use this external can be found in the help patch and the included Flash example file.
Please note that Flash as Plug-In in a web page only allows connections to the IP the flash movie was downloaded from! So your Max/MSP machine has to run the web server as well.

The flashserver web page, from which this object may be downloaded, is located at:

http://www.nullmedium.de/dev/flashserver/

Please e-mail any bug reports or suggestions to Olaf Matthes (olaf.matthes@gmx.de).

Enjoy!

License Agreement

The Software is provided by Olaf Matthes (hereinafter referred to as the "AUTHOR"), free of charge and may be distributed free of charge, provided that this documentation is included unchanged with the software. You may not sell the software, nor may you take a fee or commission for providing the software to another person, nor may you include the software with or as part of other software that is sold for a fee without prior written permission from the Author. Source code for the software, if provided, can be re-used for educational or non-commercial purposes provided the Author is credited both in the product source and in the final product. The source code for this software may not be re-used for commercial purposes without negotiating and obtaining a commercial licensing agreement from the Author.
Currently, this software needs to be registered with the author, Olaf Matthes, to be used. Use of this program is illegal if you are not registered. Please note, that currently this program can only be used for research and experimental purposes and not for commercial use of any kind. If this program is used without registration or after a erasure request issued by the Author, the user is responsible for the illegal use of the program and agrees that any legal actions against the Author will be redirected to himself (the user) without contradiction.

Disclaimer of Warranty on Software

The software is provided "AS IS" and without warranty of any kind. The Author expressly disclaims all warranties, express or implied, including, but not limited to, the fitness for a particular purpose. The Author does not warrant that the software will be uninterrupted or error-free, or that defects in the software will be corrected. Furthermore, The Author does not warrant or make any representations regarding the use or the results of the use of the software in terms of their correctness, accuracy, reliability, or otherwise. No oral or written information or advice given by the Author shall create a warranty or in any way increase the scope of this warranty. Should the software prove defective, you (and not the author) assume the entire cost of all necessary servicing, repair or correction of the software, or the computer system with which it is used.

Limitation of Liability

Under no circumstances, including negligence, shall the Author be liable for any incidental, special, or consequential damages that result from the use or inability to use the software, even if the Author has been advised of the possibility of such damages.
